W01 Readings

01/12/24

* opportunity to learn
  - Read for understanding, not completion
  - work through code excersises & examples

Syllabus

Good understanding of:

1. - variables   - scope   - template literals
2. Array methods → .forEach(), .map(), .filter(), .sort()
3. Function — declaration, expression, arrow
       ↳ callbacks
4. Basic DOM manipulation
5. Basic event management

* weeks 1-9 → Real world project in teams
* weeks 10-14 → design & complete a project of choice (also teams)
   - weeks 1-9 HW (weekly)
      - Reading   - team activity   - trello cards

Working with Groups

TIPS & TOOLS
  - make it a priority
  - Find a good way to communicate   ⎤ checkin w/ eachother
  - track & assign tasks   ⎦ regularly
  - Find a way to avoid stepping on toes

Questions

  - Are we <u>required</u> to meet as a group each
    week (outside of class), or is it just
    recommended?
  - Also still a little confused on DOM manipulation
    & callbacks
         ↳ class cleared some of this up
